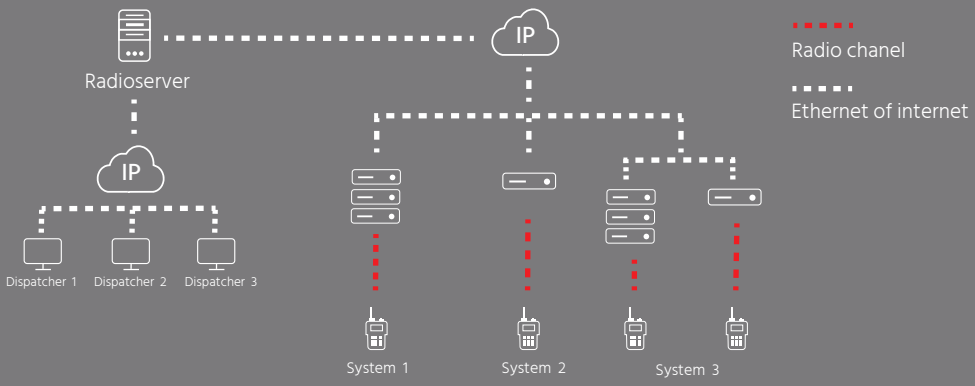
Works with Motorola Solutions MOTOTRBO™ radio systems

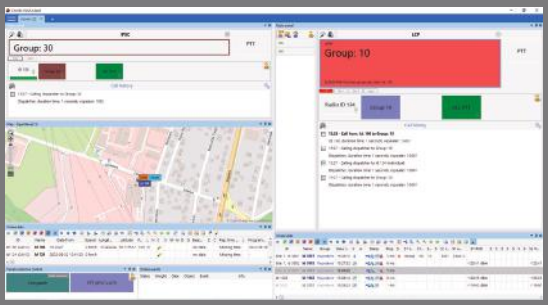
Application sold and supported by Motorola Solutions. Operates with MOTOTRBO radio systems. Used with Motorola MOTOTRBO radio systems, it offers a significant increase in their functionality. The IP-based solution allows dispatchers to work from multiple locations, transmit voice and send text messages, archive them, communicate with other dispatchers, diagnose the radio system, as well as a range of other functionalities increasing the system's operation efficiency.



ConSEL PLUS IS A SCALABLE SOLUTION,
compatible with MOTOTRBO equipment, allowing connection to one or more systems, thus ensuring the possibility of integration and communication between their users and dispatchers.

Compatibility:

- IP SITE CONNECT
- CAPACITY PLUS SINGLE SITE
- CAPACITY PLUS MULTI SITE



View of the dispatcher console working with two wide-area systems (IP Site Connect and Capacity Plus Multi Site). LOCATION POSITIONING module running. The console shows the use of the function key functionality (direct call to an individual contact or a group).

Core

- Voice & data transmission
- Text Messaging, sending text messages (predefined or entered by the dispatcher) from the console.
- Cross Patch
- Intercom/Chat Between Consoles
- Alarm
- Light or Dark themes
- A wide range of configuration options (e.g. console window appearance, window frames, buttons for quick individual or talkgroup calls)allowing the application to be tailored to the user's requirements
- Dedicated buttons

Optional

- GPS Location Monitoring
- Repeater Diagnostics
- System Bridging
- Voice Recording
- AES256
- Coverage Map
